

850 Inbound Purchase Order

Macy's
VICS Document Mapping

VICS Version 4050
Effective 06/01/07

The following is an outline of what is expected when receiving VICS 850 Purchase Orders from a vendor. For definitions of the segments, please see the VICS retail industry conventions and guidelines for EDI.

Deviation from this format may negate our ability to receive data from trading partners.

Purchase orders (PO) are required in VICS 850 spreadsheet format.

If a vendor-generated Purchase Order is based on sales from a VICS 852 document, you *must* use the Purchase Order number(s) transmitted in that document. Inbound PO transmissions require a valid divisional PO number. Please contact buying office if PO number is needed.

The following segments are based on VICS 4050. Refer to individual manuals for differences in standards.

A given Purchase order number may only be transmitted to Macy's once.

To test this document, contact the divisional EDI contact listed on the Technology Contact Listing (www.macysnet.com).

Refer to the Macy's [Routing Guide](#) for routing/shipping information. For routing information, call (678) 406-7200.

Note: Functional Acknowledgments will be sent for all documents transmitted to Macy's by vendors.
