

May 5, 2017

Dear **Vendor Direct to Consumer (V2C)** partners:

Effective May 23, 2017, **V2C** outbound EDI 850 Purchase Orders may reflect a 10 character zip code, formatted as 12345-6789. This change will affect all EDI versions' N4 03 "Postal Code" data elements. If customers have not provided a full 10 digit zip code, the corresponding V2C EDI 850 Purchase Order will have the current 5 character zip code format.

EDI Mapping Guides have been updated to reflect this change. Please visit the [Macy's mapping guides](#) section at macysnet.com for further details.

Questions regarding this change should be addressed with the Macy's Vendor Direct Office at [Macys\\_V2C\\_OPS@macys.com](mailto:Macys_V2C_OPS@macys.com).
