

The following is an outline of what is expected when receiving GS1 832 Price Sales Catalog information from a vendor. For definitions of the segments, please see the GS1 retail industry conventions and guidelines for EDI.

**Note:** Macy's preferred method of receiving UPC catalog information is via Open Text.

Deviation from the standard GS1 832 format may negate our ability to receive data from trading partners. Price sales information is required in GS1 832 format.

**Note:** Extended data elements have been added to this mapping.

To test the 832 document, contact the Macy's EDI Support Center at (678) 474-3595. The following segments are based on GS1 5010. Refer to individual manuals for differences in standards.

For further assistance, contact:

- Global Standards One (GS1) at GS1US: 937-435-3870, [www.gs1us.org](http://www.gs1us.org).
- The National Retail Federation at (202) 783-7971, [www.nrf.com](http://www.nrf.com).

**Note:** Functional Acknowledgments are required from vendors for all documents sent by Macy's.

Macy's supports customized furniture ordering. Refer to the LIN and PID segments of this document.
