

April 28, 2023

Through our social purpose platform, *Mission Every One*, Macy's, Inc. is committed to operating with integrity and creating a more equitable and sustainable future. Our relationships with our people, planet and the communities we serve drive our deep sense of stewardship in how we interact with our stakeholders and underpin our commitment to promoting sustainability throughout our global value chain.

Starting in May 2023, Macy's, Inc. will be introducing a new program that will allow us to divert more waste from landfills. As part of the company's 2025 Sustainability goal to divert 80% of waste from landfill, we will be donating eligible returned and unsold products to charities that will directly use or distribute those products. If there are any questions regarding this new program, please contact your Buying partner for more information.

This does not impact any current process around products salvaged/liquidated.
