Introduction

To all Macy's and Bloomingdale's Furniture & Bedding Vendors:

Macy's and Bloomingdale's goal is to consistently offer, sell, and deliver products and services that our customers perceive to be of superior value and to combine it with our on-going commitment to quality and exemplary customer service. That goal cannot be achieved overnight and even as it is being achieved, requires continuing effort that includes maintaining strategic alliances with our vendors, merchants, delivery agents, stores, facilities and customer service personnel. We look to each of our vendors as a valued resource, that will strive to maintain a level of quality and workmanship and an effective inspection process that meets our quality standards, including as outlined in the following **Furniture, Bedding, and Rug Packaging and Quality Standards**, which apply to all Macy's and Bloomingdale's vendors of items tracked on our Big Ticket Reservation and Delivery System (RDS). These standards provide our packaging and related requirements and it is of particular importance that every vendor be aware that Macy's and Bloomingdale's require adherence to our "Level of Expectations" with respect to:

- What the Macy's/Bloomingdale's merchant sees and approves is what we receive
- Product Quality is good, consistent with samples and free of defects
- Product complies with Macy's Vendor Standards, including this Furniture Packaging and Quality Standards
- Product is packaged and protected properly in accordance with all applicable Vendor Standards, including those set forth in these Furniture Packaging and Quality Standards
- Product is loaded on clean, properly prepared trucks or containers with care and is properly protected so that we can:
 - Receive, locate, and pick
 - Deliver to our consumer
 - Open (from the manufacturer's packaging) at the customer's home, confident that the product is free of defects
- Warranties and all vendor obligations in respect of our customers commence upon delivery to the customer

It is essential that all of us must embrace the Upstream Quality process in order to reach our goal and achieve lasting success, a success that encompasses:

- Design
- Manufacture
- Packaging
- Loading

Vendors are encouraged to work with our Vice President National Director of Quality and personnel responsible for quality control at each of your factories. Please take notice that, should any deviation from these standards occur that requires repair work or should any repair work otherwise be performed, Macy's or Bloomingdale's, as applicable, will be compensated for any and all expenses for such work.

In addition to the requirements in this document, our vendors are also required to comply with all applicable federal, state and local laws and regulations ("Applicable Law"), as well as the Macy's Vendor Standards, generally, which are posted at *macysnet.com*.

Quality Standards

General Requirements for all categories

1. All merchandise must be free of structural, finish and tailoring defects, faulty materials and/or workmanship deficiencies. In the event of such a defect or deficiency, a workroom charge will be charged and/or the merchandise will be returned to the vendor.
2. All merchandise must be free of dirt, grease and inappropriate stains.
3. All merchandise must be factory packaged for direct delivery to the customer, without requiring touch-up or repair and, if, upon inspection, your product requires touch-up or other repair, a workroom expense offset will be assessed. In addition, should in-home service or an exchange be needed, a workroom expense offset will be a charged to cover the service call and/or a second delivery.
4. All packaging for non-upholstered product must meet or exceed the current railroad and motor freight specifications to ensure sufficient protection during normal handling. Specifically: All vendors comply with packaging standards consistent with "Rule 181" of the National Motor Freight Classification, www.nmfta.org, issued on March 29, 2001. All expenses incurred for damage due to insufficient packaging will be charged back to the vendor as a workroom expense offset and may result in RTV.
5. All items (except beds and knock down furniture purchased as such) must be pre-assembled, unless the appropriate Macy's or Bloomingdale's merchant and the Supply Chain Vice President and National Quality Director agree otherwise by special arrangement. Special arrangements must be pre-defined and approved, in writing by the Supply Chain Vice President and National Quality Director, prior to shipping to a Macy's/Bloomingdale's DC.
6. All hardware shall be installed or packaged securely so that it does not damage the item or become lost. A red or orange hardware package or identifying tape is required to make the hardware stand out from the internal packing materials.
7. All staples, screws, nails, dowels, hardware, and other components shall be the proper type, size, quantity and style for the application and must be installed or, if not installed, must be provided, red or orange hardware package, or identifying tape, is required to make the hardware stand out from all the internal packing materials, packaged and securely attached so as to not damage the item or become lost.
8. Nail holes are to be filled and properly finished.
9. Functional and moving parts must operate as intended.
10. All Applicable Law, which includes local and state fire and flame retardant codes, must be met.
11. All products with electrical components must meet UL/CE Standards. See Underwriters Laboratory, www.ul.com.

Case Goods

1. All case goods must be free of lifting veneer, season or windshake splits and warping.
2. Doors must be aligned for proper opening and closing.
3. Clearance distance around doors and drawers must be uniform.
4. Drawers must have free running action and not bind at any point.
5. Joints and seams must be closed and tight.
6. Backing material must be of good quality material, securely fastened to ensure stability of the case. Case backs must fit flush with edges of the side panels and top of case.
7. Splintered and ragged edges are not acceptable.
8. Tops must be properly fitted to case and free of splits, poor repairs and warps.
9. Finishes must be even and consistent in color and sheen. They must be free of dirt, dust, and orange peel effect and free of milling, buffing marks, packing marks, and core depressions.
10. All components, including fabrics, must meet all Applicable Law, including all regulatory requirements.
11. Finished surfaces must be free of nicks, scratches, season splits, foreign material, abnormal blemishes, unsightly burn-ins, runs, bubbles, and machining marks.
12. Veneered tops must be matched for color, uniformity and be free of chip-outs and other defects and imperfections.
13. All pieces in any particular cutting of a group must be uniform and consistent in color.
14. Any variation in production that alters the appearance or structural integrity of a piece from what is originally displayed on the selling floor, must be communicated to the Vice President National Director of Quality and will not be accepted unless approved in writing by such executive.
15. Marble must not be chipped, cracked or scratched and must fit properly.
16. Table slides must work freely and smoothly, be properly aligned, and be secured to the bottom of the tab.
17. All table leaves must be pre-fitted at the factory, with the grain matched to the table as closely as possible. The holes and pins are to be in line and the center of the top square. The fit at the center and at adjoining leaves should have no variance greater than the thickness of a typical credit card. Apron spacing should be uniform on all sides of the table.
18. All glass, including mirrors, must be free of chips and scratches and secured so as not to shift or rattle.
19. Factory repairs, including repairs effected by patches and burn-ins, will be accepted only if they are imperceptible.
20. Moldings and trim pieces must be securely installed and fit flush with the case.
21. Cases must be square within 1/64" per foot and free from racking. All case goods must be pre-drilled and pre-fitted for hardware when hardware is not attached by factory.

22. Horizontal, large and heavy pieces must be level to within 1/32" or have levelers that are designed for the case and easily adjusted.
23. Mortise and tenon joints must not exceed 1/32" opening from the edge of the member to the edge of the tenon.
24. Miter joints are to be completely closed.
25. Beds must be pre-tested at the factory for proper stability and alignment. Appropriate hardware for attachment of headboard, footboard and frame must be secured and packaged with the bed. Directions for assembly must be part of the hardware package and include approximate time required for assembly. A red or orange hardware package, or identifying tape, is required to make the hardware stand out from all the internal packing materials.
26. Beds rails must be free of splits, poor factory repairs, lacquer runs and other visible defects. Finger jointed slats are unacceptable.

Upholstered Furniture

1. Frames must be free of any knots, splits and wind-check that would weaken it structurally.
2. All joints must be properly fitted and tight.
3. Zigzag springs must be firmly anchored and laterally secured in at least two points in seat and back.
4. Hand-tied coil spring platform must be secured with at least six-way tie and double knot to each spring with high quality twine.
5. All springs in both seats and backs must be fastened and have Teflon lining so that there will be no noise while item is in service.
6. Skirts must be properly lifted and secured in transit.
7. Skirts are to be evenly centered and uniform in height.
8. Tailoring from side-to-side must be symmetrical.
9. All covers must be free of pulls, mis-weaves and off-shade color streaks.
10. All patterns and stripes must match as closely as possible unless railroading has been agreed upon by the appropriate Macy's/Bloomingdale's merchant and the Vice President National Director of Quality (732) 661-3029.
11. Seams must be straight and stitching must have a minimum of six stitches per inch with no skips.
12. All loose threads, lint and dust must be removed before shipping.
13. All exposed wood should be properly finished in accordance with standards outlined in case goods.
14. Fabric dye lots must be consistent in color and shading.
15. No visible color variation between pieces in the same group or within a piece itself is permitted.

16. Flaws, mis-weaves, pile crush and “slubs” are considered a defect and are not acceptable.
17. Any change occurring in production that alters the appearance or structural integrity of an item from what is originally displayed on the selling floor, must be communicated to the Vice President National Director of Quality and must be approved in writing.
18. Cushions are to be aligned and spaced equally between arms and backs with tolerance not to exceed ¼” on front facing cushions (front and back).
19. Sectional pieces must match to within ¼” in height, pitch, and parallel alignment for the back frames.
20. If a center leg is required for frame support, a warning label or hangtag must be attached to the item.

Leather Goods

All leather furniture must meet all of the General and Upholstery requirements, as well as the following requirements:

1. Leather is to be free of indentations due to improper handling or packaging and must be properly fitted and securely glued.
2. Vendors must furnish, with all pieces of leather, a hangtag of explanation covering the inherent imperfections in genuine leather, such as natural scars.
3. Leather tops must be fitted and glued flush to rim with no visible bubbles.
4. All items must have proper protection to include top, sides and edges to prevent transit and handling damage.
5. The proper placement of hide imperfections on leather furniture is essential. Natural marks are not considered a defect. However, these marks cannot be unsightly.

Wrought Iron and Metal

1. All metal fabricated items must have evenly flowed welds.
2. All welding slag must be removed and properly cleaned. Sharp and/or protruding fragments are not acceptable.
3. Any unit in which the weld is burned in too deeply, leaving an unsightly or uneven weld, will be rejected.
4. Any piece having peeling or chipping paint, whether or not due to improper application or cleaning, will be refused and returned.
5. All pieces must be properly assembled to ensure that they are both square and level.
6. All pieces must have proper quantities of the leg tips and/or glides properly installed or securely attached to item for installation.
7. All resources must furnish touch up paint to ensure proper color match on items that become nicked or chipped.
8. Mesh tabletops and seats must be free of oil residue.
9. Aluminum and Steel tube seams must be polished so that seams are not visible.

Mechanisms

1. Spring units must have padded no sag clips and be installed in a manner that prevents noise from rubbing of metal-to-metal or metal to wood.
2. Units must be free of binding through their entire range of operation.
3. Bases must hold unit level and not lean or tend to lean in any direction.
4. Units are to be attached with appropriate hardware that prevents failure of units to operate or permits damage.
5. Units must be installed uniformly, with equal clearance on fronts, backs and sides.
6. Units cannot have loose wires.

Bedding

1. All product shipped to our facilities must meet or exceed current federal, state and any local legal requirements for flame retardance.
2. Independent coil systems must be permanently encased, with coils individually pocketed to ensure that each coil acts independently and does not affect other coils.
3. Coils need to be bonded for unitized construction to prevent coil shifting.
4. Open coil systems must fill all corners, with sufficient padding to prevent coils protruding through quilting.
5. Coils must be supported between the border rods for better support at the sidewalls.
6. Unitized upholstery is required to prevent lumping or shifting of upholstery materials.
7. No loose grid permitted on box springs.
8. No bent or loose steel span permitted on box springs.
9. No misaligned corners permitted on mattresses or box springs.
10. No bent border wires on mattresses or body depressions permitted.
11. No dirty, torn or faded covers on box springs or mattresses.
12. All vendors of pillow top bedding must construct pillow top to prevent shifting.
13. Binding construction on the pillow top must be even with binding on the mattress.
14. All stitching of binding and quilting must be secure to prevent seams or patterns from not pulling apart.
15. Where special arrangements are made regarding floor samples, each item must be handled in the appropriate manner as dictated by the applicable Division. Note that floor samples:
 - a. Are not eligible for drop ship direct to the stores
 - b. Must have a GS1 128 label, with an ASN, distributed by store and with an accurate U.P.C.
 - c. Must be shipped to the appropriate DC according to the CURRENT Routing
 - d. Guide posted on www.macysnet.com

Product Identification

All Merchandise

1. Location of hidden components must be clearly marked on product as well as hardware. Colored hardware pack (red or orange) is required.
2. All merchandise that is sold with separate components that are not packaged together requires each component to have its U.P.C. and must have appropriate labeling as defined within these guidelines.

Carton Markings

1. All cartons must comply with "Line to Concrete" standards. See page 18, item #1.
2. Weight of product must be indicated on packaging.
3. Front and back of product must be identified on the carton.
4. Directional arrows should be applied when applicable.
5. All pieces to a set must come with separate SKU's identified on the cartons.
6. The outer wrap must include your GS1 128 label, U.P.C. number(s), if the U.P.C. number is on a separate label than the GS1 128 label, and U.P.C. label must be applied to the same side of the carton next to one another.
7. Ship from (Vendor) name and address.
8. Ship to (Distribution center) name and c/o Macy's Home Store and address with no abbreviations.

EXAMPLE Macy's RARITAN DISTRIBUTION CENTER #RF
c/o Macy's Home Store
401 Clearview Rd Building 2
Edison, NJ 08837

9. Purchase order number (use a minimum 20 point bold font).
10. Department number (use a minimum 20 point bold font).
11. The FOB description i.e. Furniture or Bedding, which should be placed below "Mark for" and "Store Number" on the UCC format in "Zone H" using a minimum 12 point bold font, 30 point bold font is recommended. The FOB description will be provided in the EDI 850.
12. Store number – 4 digit number (Use minimum 20 point bold font) and store name (No abbreviations).
13. Human readable GS1 128 20 digit code and barcode when sending an EDI Ship Notice (856).
14. U.P.C. number and barcode of each item in the carton (in Zone G of the GS1 128) along with quantity of each U.P.C..
15. Color and/or Cover number.
16. If the carton is not properly labeled with an GS1 128 label and a U.P.C. on the item and the label, an expense offset will be assessed.

Furniture Product/Labeling Identification

1. The U.P.C. and GS1 128 labels must be securely affixed to the merchandise.
2. The U.P.C. label must be located on item(s) as follows:

Case goods with unfinished backs	Top left or right back
Case goods where backs are finished	Bottom inside back
Occasional and dining tables	Underside of front rail or apron
Upholstered items	On deck or deck label
Dining, wood or metal chairs	Underside front rail
Sleepers	On deck label or sleeper mechanism
Recliners	Underside of ottoman

3. In addition to the U.P.C., the following product identification must also be included where appropriate:
 - Special and custom order merchandise must be clearly marked as such and show customer's name and address.
 - On drop ship orders sales check number must also be provided. Link to Appendix for Custom Label Specifications.
 - Specified consumer literature must be affixed in a manner not to harm the upholstered furniture it must be attached through seams/welts. This includes UFAC tagging. Use extreme caution when information packet comes in contact with leather products.
 - Any special permanent identification on the interior or exterior of the merchandise must be attached as specified in a neat workmanlike manner.
 - Where local tax stamps or exemption permit numbers are required, they must be affixed to or printed on the law label.
 - Table leaves (or similar product parts) must be shipped in the same carton as the table (product) unless otherwise approved.
 - If table leaves or parts are shipped separately from the table (product) they must have a separate U.P.C. assigned and a separate GS1 128 label, so that they can be properly matched to the parent product.

Bedding Product/Labeling Identification

1. Your U.P.C. must be securely affixed to merchandise in a location near the law label, but may not impair the legibility/readability of information on law label.
2. You must ensure that all labels comply with all Applicable Law.
3. In addition to U.P.C., the following product-related material also must be included, as appropriate:
 - a. Proper bedding law labels, attached in a manner that covers the fabric but will not damage fabric when removed;
 - b. Customer literature must be affixed so as to not to harm the Bedding;
 - c. Any special permanent identification on product exterior must be attached as specified and in a neat workmanlike manner (e.g., on a corner sash); and
 - d. Any local tax stamps or exemption permit numbers required must be affixed to or printed on the law label.

Bedding Identification on Outer Wrap/Carton Product

1. The outer wrap must include your U.P.C. label, which must match the U.P.C. on the merchandise.
2. U.P.C. and GS1 128 labels must be securely affixed and located on the side panel and clearly show on at least one side all of the following:
 - a. Ship from (Vendor name and address);
 - b. Ship to (Division name c/o distribution center name and address with no abbreviations);
 - c. Example:

Macy's East c/o Raritan Distribution Center #RF 401
Clearview Rd, Building 2
Edison, NJ 08837
 - d. Purchase order number (use a minimum 20 point bold font);
 - e. Department number (use a minimum 20 point bold font);
 - f. FOB (Family of Business) description, which should be placed below "Mark for" and "Store Number" on the UCC format in Zone H using a minimum 12-point bold font, 30-point bold font is recommended. The FOB description will be provided in the EDI 850 or see Appendix E of the Vendor Standards. Store number (Use minimum 30 point bold font) and store name (no abbreviations);
 - g. Human readable GS1 128 20 digit code and barcode when sending an EDI Ship Notice (856);
 - h. U.P.C. number and barcode of each item in the carton (in Zone E of the GS1 128 if using GS1 128 labels) along with quantity of each U.P.C.; and
 - i. Color and Cover number.

GS1 128 Labels

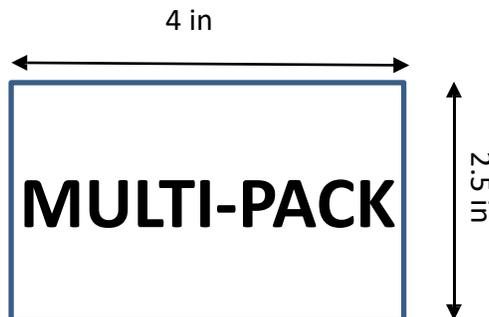

GS1 128 labels must be securely affixed to merchandise carton or packaging as follows:

A. Mattress or Box Spring all sizes	Minimum (2) GS1 128 labels placed on opposite ends of the bedding down and center 24" from the top
B. Upholstery (Sofa, Loveseat, Chair) in carton (Boxed)	Minimum (2) GS1 128 labels Center Back Placement and Center back cushion
C. Upholstery (Sofa, Loveseat) vertical on end in Plastic or Fabric wrapping	Minimum (2) GS1 128 labels Center Back Placement and Center back cushion
D. Chest, Dresser, Nightstand, Armoire, Credenza, Outdoor Furniture Chaise & Chair, Ottoman, side tables (case goods product)	Minimum (2) GS1 128 Labels should be placed from 2.00" from top and 2.00" from side (right hand top corner) and side of product (line to concrete – Arrows Up)
E. Mirror, Tables, Outdoor furniture Table, Umbrella), flat case goods product - Bed components	Minimum (2) GS1 128 Labels should be placed from 2.00" from top and 2.00" from side (right hand top corner) and side of product (line to concrete - Arrows Up) For items with a depth of less than 3" label should be wrapped from side to opposing side. (Line to Concrete - Arrows Up)

Multi-Pack Standards

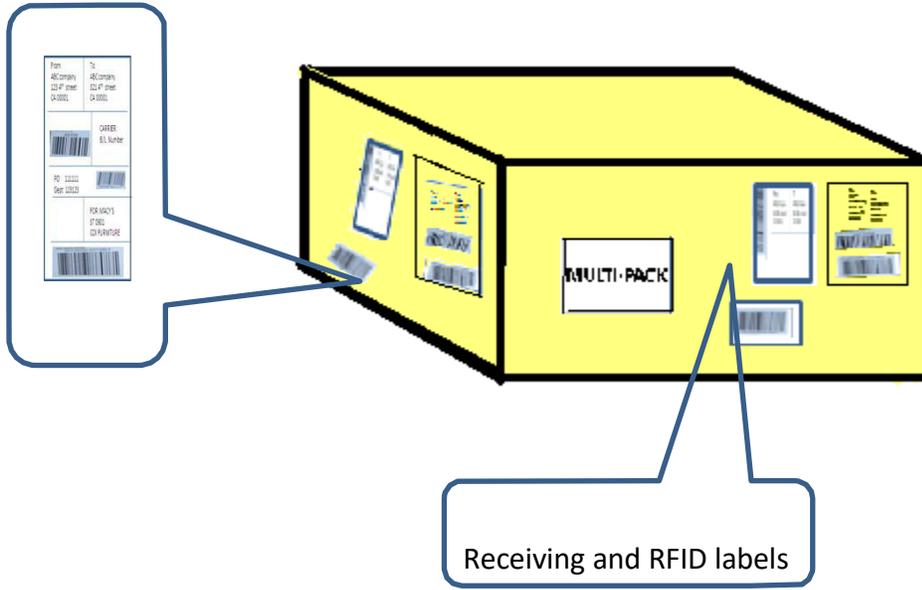

Multiple units in a carton must be the same SKU/Style and for a single location.

In the event vendor chooses to ship multiple units in a carton such as: chairs, outdoor merchandise, tables, rails, etc., the carton must be identified with a multi-pack label per the illustration and must also clearly show the number of units contained within the carton.

The GS1 128 label should contain the complete data for all units within the carton. There should not be a separate GS1 128 label on the outside of the carton for each unit contained within the carton.

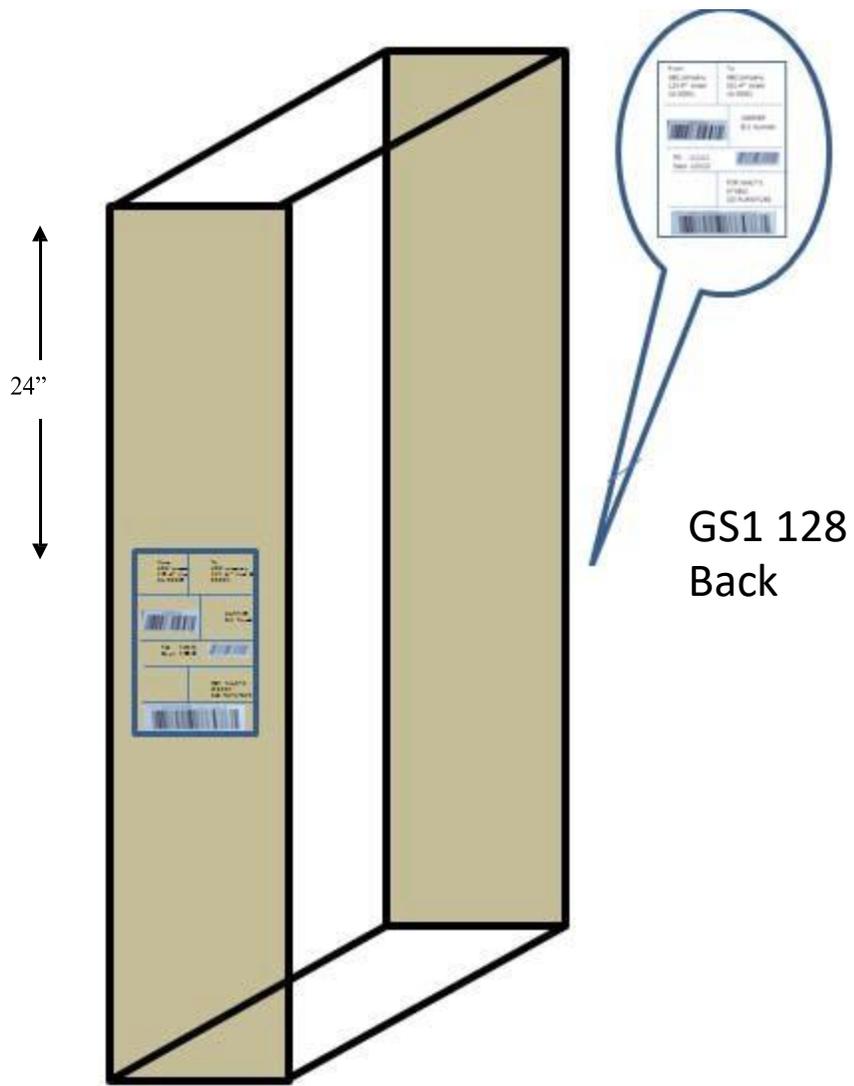

GS1 128 Labels

GS1 128 Label Placement

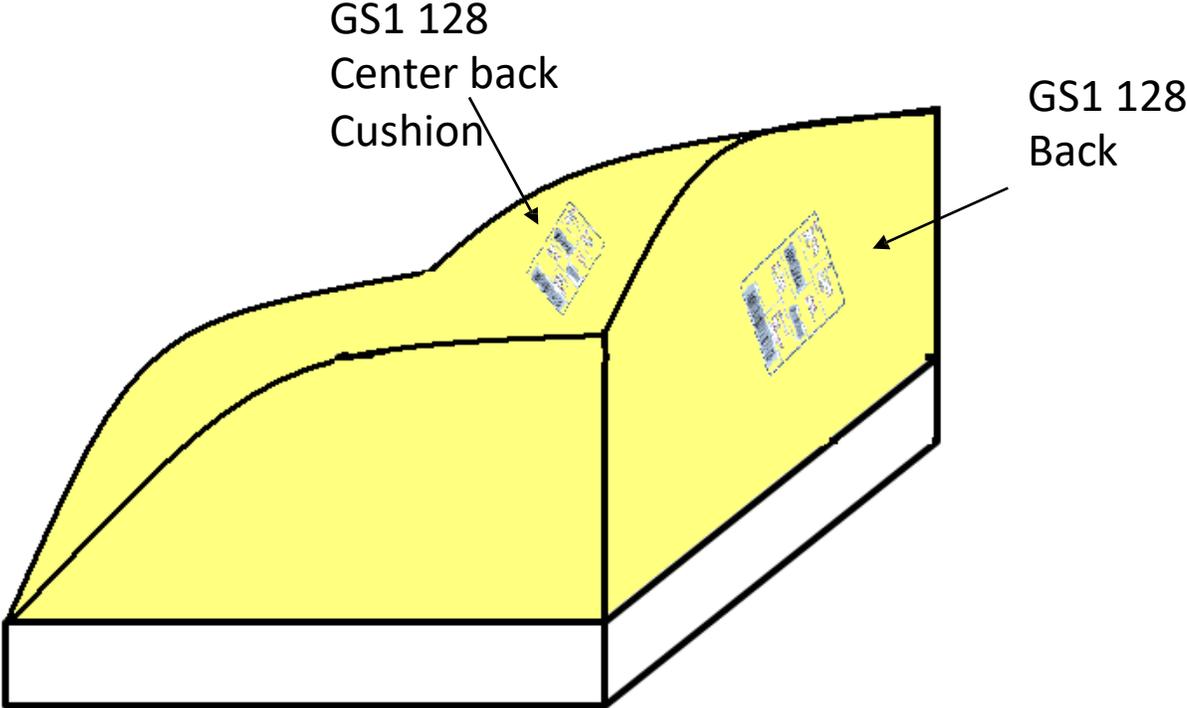

The Following Illustrations will guide you on Label Placement Standards for Furniture & Bedding Product Categories:

Mattress or Box Spring all sizes:

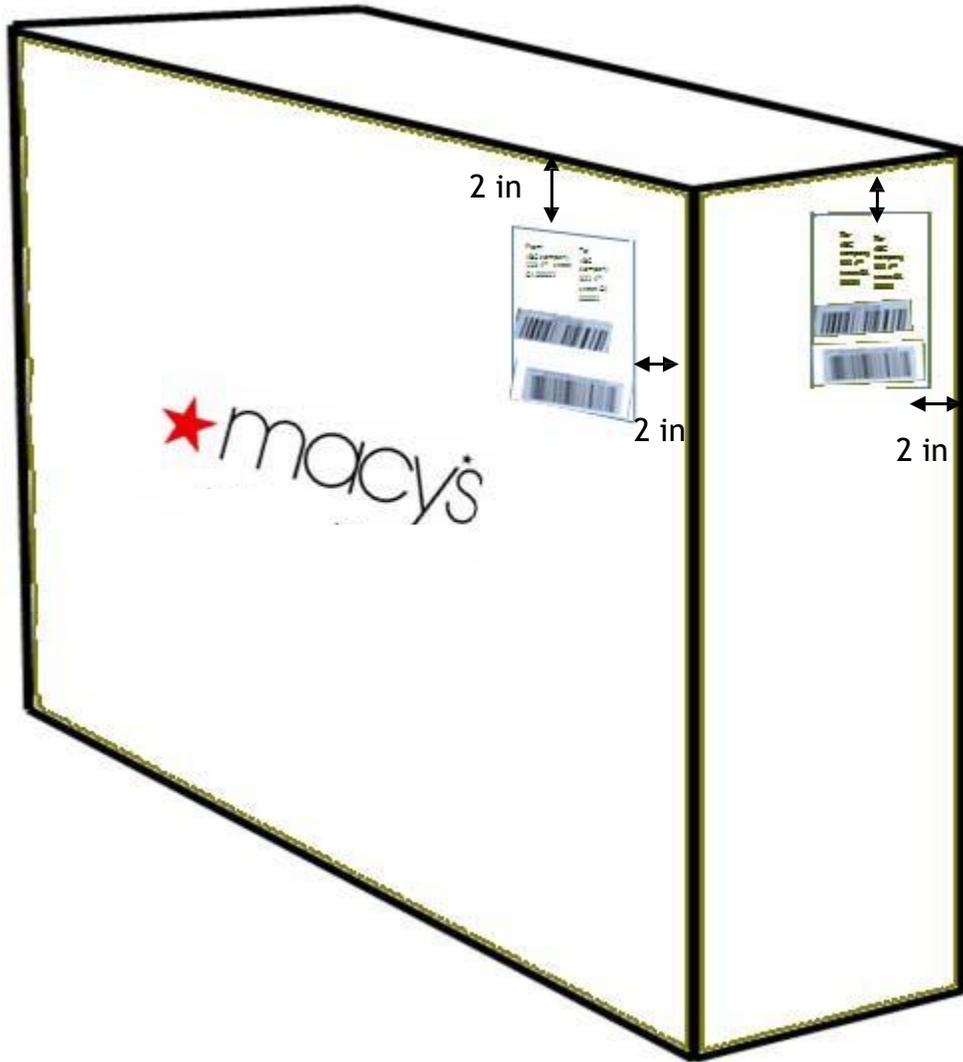

Upholstery (Sofa, Loveseat, Chair) in carton (Boxed)

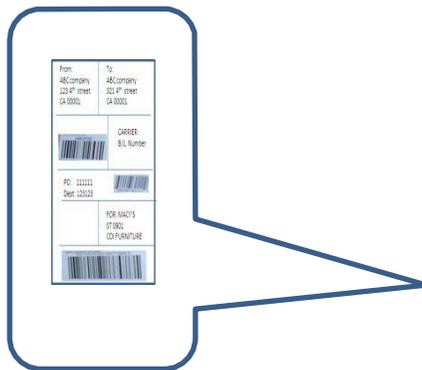

Upholstery (Sofa, Loveseat) vertical on end in Plastic or Fabric wrapping

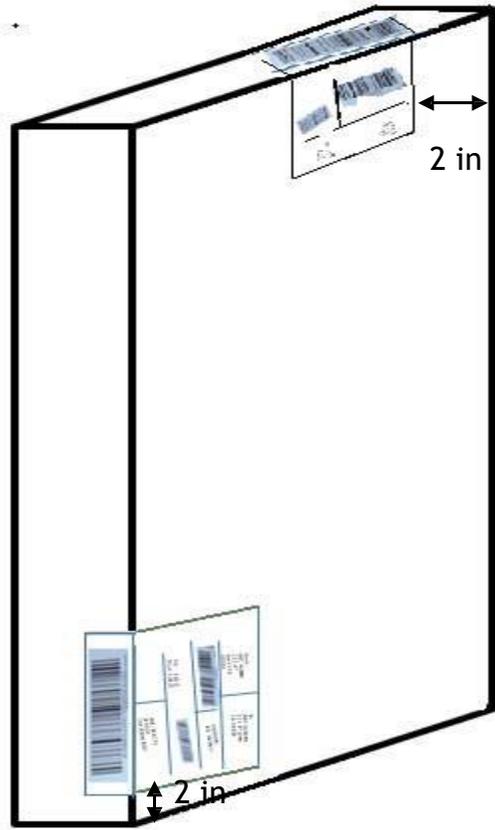

Chest, Dresser, Nightstand, Armoire, Credenza, (case goods product)

Mirror, Tables, flat case goods product - Bed components (bed rails)

Merchandise Packaging

Macy's and Bloomingdale's require all vendors to pack their product in a manner that will ensure damage free delivery to the consumer. Our minimum packaging standards are as follows:

Upholstered Furniture

1. Merchandise must be shipped either fully cartoned (preferred) or with a "cardboard end cap rising from the bottom over and around one arm of the upholstered piece plus a cardboard bottom tray is required for proper protection prior to the plastic wrap" with a minimum 6 mil plastic, and shrink-wrapped or taped to secure completely around the bottom.

2. Legs need to be protected by colored (red or orange) bubble plastic wrap. Staples should not be used to secure legs.
3. The proper quantity of nuts, bolts, screws, and tools should be included inside colored (red or orange) plastic bags for assembly with detailed, easy-to-assemble instructions. These instructions should include a listing and location of the parts and tools required for assembly.

Non Upholstered Furniture

1. Carton markings - All cartons must have:
 - a. "Line-to-Concrete" marking
 - i. This identifies how product should be handled at all points of contact inclusive of loading and warehousing
 - ii. Product must be packaged so that it is protected at all "line-to-concrete" points

- b. Front and back of product must be identified on the carton
 - c. Directional arrows should be applied when applicable
 - d. Where parts are separated in the carton, a warning to the customer must be located on the outside of the carton
 - e. Weight of product must be indicated on packaging
 - f. g. Must be labeled with a VICS standard GS1 128 label that meets all guidelines within this document
2. All packaging for non-upholstered product must meet or exceed the current railroad and motor freight specifications to ensure sufficient protection during normal handling. It is required that all vendors comply with packaging standards consistent with "Rule 181" of the National Motor Freight Classification, www.nmfta.org issued on March 29, 2001.
3. Location of hidden components must be clearly marked on product as well as hardware. Colored hardware pack (red or orange) is required.
4. All pieces to a set must come packaged separately. Each piece must be labeled with the SKU and U.P.C. identified on the cartons and on each piece.

Proper packaging is necessary in order to prevent wood-to-wood contact, including:

1. Doors on case goods must have protection between the top and bottom horizontal rails and edges of doors.
2. Doors must be secured to protect against damage from door latches.
3. Loose components, i.e. shelves, crowns, legs, handles, etc., must have protection between them and other surfaces.
4. Loose components should be secured in such a way as to not move during transit.
5. Edges, corners and tops must be protected against carton rubs by a foam or cloth wrap.
6. Corrugated or Styrofoam corner blocks must be used to protect against damage.
7. Chairs must be in cartons with foam/plastic wrap along with an inner pack that allows the chair to float.
8. Chairs, tables and all other wood furniture can have no wood-to-wood or wood to carton contact.

Bedding

1. Mattresses and box springs to be wrapped in 4 mil or higher plastic bags. A double boot at the bottom of the mattress and box spring as necessary.
2. Mattresses to have additional reinforcement of packing materials at the bottom when necessary.
3. Latex, solid foam, visco-elastic mattresses must be packed in corrugated containers to maintain integrity of mattress during transportation to a Macy's Logistics facility.

Merchandise Loading

Loading Standards

1. Trucks/Containers need cardboard lining on the truck/container floor and walls
2. Vendors should ensure that trucks/containers are loaded with merchandise that is:
 - a. Facing in proper direction for transporting:
 - i. "Line to Concrete" standard when applicable
 - ii. "Arrows Up" when applicable
 - b. Lighter product on top
 - c. Loaded securely to prevent shifting during transport
 - d. Grouped by Purchase Order with labels facing out

Rugs

Rug Packaging Standards

The Department Number assigned by Macy's and Bloomingdale's and size of rug, determines their packaging, labeling and manufacturing requirements. To avoid damage and creasing caused by improper folding, packaging and transport of rugs, please review carefully, what standards apply to the rugs you are manufacturing and selling to Macy's and Bloomingdale's.

Rugs Smaller than 36 inches by 36 inches for All Departments

Rugs smaller than 36 inches wide and 36 inches long may be shipped with multiple pieces for one store, from one purchase order, within the carton or plastic bag. Each unit must have an individual U.P.C. attached, number of units within the container on the outside of the carton/bag, a scan able GS1 128 label and unit level data to support the barcode and the carton/bag must meet all other packaging and labeling standards as defined within this document and General Requirements guidelines.

Weight and size requirements for shipping multiple piece cartons/bags are maximum length 40", maximum width 40", maximum height 30 and weight maximum 50 lbs.

Carton size and packaging requirements apply to all multiple piece rug and rug pad packages shipped to a Macy's/Bloomingdale's Distribution Center including:

1. Do not over pack the carton/bag. This affects the integrity of contents and impairs the ability to scan the GS1 128 label.
2. Carton strength should be a minimum of 32 ETC (edge test crush)=150 mullen.
3. To prevent crushing during transit. Large or heavy cartons may require a higher.
4. Seal cartons securely with security / reinforced tape. All openings on all sides of the carton/bag must be sealed using the "H" method.
5. We encourage the use of "environmentally friendly" packing materials whenever possible (recyclable and/or biodegradable).
6. Do not shrink wrap multiple cartons/bags together as "one shippable carton" due to the possibility of separation.
7. Make sure each carton/bag contains merchandise for only one selling location.
8. Do not Master pack cartons and assume that the Distribution Center will unpack to ship to multiple locations.
9. If rugs are shipped as multiple pieces per carton, cartons should have a usable GS1 128 label affixed to the upper right hand corner of the carton/or on the bag on two sides and ASN data with accurate carton defined in the GS1 standards.
10. Number of units within the carton must be identified on the outside.

Rugs Department 632

Rugs larger than 4 feet wide must comply with department-defined standards below:

1. Rugs 6 x 9 feet and larger should be tri folded, bagged or protected.
2. Machine Made and Hand Made Rugs smaller than 6 x 9 feet should be rolled and shipped on pallets to the distribution center or store identified in the routing guide for Macy's and Bloomingdale's(macysnet.com).
3. Rug pallets should have bottoms covered with cardboard to protect rugs from damage.
4. All rolled rugs should be rolled with the pattern facing the inside.
5. All rugs must be packed in a 6 mil or higher plastic bag or shipping container.
6. All Rugs must have a unique U.P.C. number and barcode/human readable data, manufacturer name, size, material content, country of origin and any government required law labels, permanently affixed on the back of the rug.
7. Special orders and "one of a kind" rugs must also comply with the same rug packaging and labeling standards as stock rugs, and as defined in these standards.
8. All **stock** rugs should be shipped into Macy's/Bloomingdale's Distribution Centers or designated stores based on individual arrangements provided by Macy's Transportation Office and the appropriate Macy's/Bloomingdale's merchant.
9. Rugs shipping to a DC for redistribution to stores must be segregated by store and should have a cardboard or paper separator between merchandise for each store.
10. Palletized rugs should be stacked no higher than 5" feet high on any pallet and must be secured to the pallet and other rugs to aid in stability of the load.
11. If rugs are received damaged or soiled due to poor shipping or packing practices, an expense offset may be assessed and vendor will be required to provide an RTV for full cost of goods.
12. Rugs too large to palletize must be loaded on the trailer by store.
13. The GS1 128 label must be easily accessible and attached securely to avoid damage, to the plastic packing bag on the end of the rug. GS1 128 labels can be hangtag-attached with wire swift attach so long as all labels are placed in the same location on the same end/side on each rug on the pallet.
14. Rugs should follow all of the technology and U.P.C. guidelines noted within these standards.
15. If no ASN is provided each pallet should be flagged with packing slips listing the purchase order number, department number, vendor number, along with the style and stores included on the pallet.
16. If vendor is providing usable ASN and GS1 128 label and supporting data for each rug on the pallet no packing slip is required.
17. Customer special order rugs will be drop shipped directly to the customer's home unless otherwise specified and arranged through Supply Chain and Rug department.
18. All rugs must have an EDI 856 ASN transmitted at time of shipping in order to facilitate timely invoice payment and customer billing.

Rug Product /Labeling Identification

1. U.P.C. and GS1 128 labels must be securely affixed to your merchandise with a swift attach or metal ring and must be easy to access at one end of the rugs on the same pallet. In addition to the U.P.C., the following product identification must also be included where appropriate:
 - a. Proper law labels must be attached in such a manner that will not damage the rug if label is removed.
 - b. It is your obligation to ensure that your labels comply with Applicable Law and regulations.
 - c. Specified consumer literature must be affixed in a manner not to harm the merchandise.
 - d. Country of origin and content labels according to legal requirements.
 - e. Where local tax stamps or exemption permit numbers are required, they must be affixed to/or printed on the law label. Floor samples **MUST** have a unique U.P.C. and vendor style assigned to each of the items.
2. Trucks need cardboard lining on the truck floor and walls. Trucks need cardboard lining on the truck floor and walls.

Operating Requirements - Furniture

Macy's and Bloomingdale's require our vendor partners to meet the quality expectation of our customers. This is achieved by Macy's and Bloomingdale's Upstream Quality program, which requires a partnership with our vendors in creating the specifications for and then producing a product that ensures that we meet these expectations. The program outlined below requires our vendors to bear the cost of failing to satisfy agreed upon product specifications. It is our objective to assist our vendors in developing means to eliminate this expense completely by adherence to quality guidelines with quality specifications in manufacturing, packaging and loading processes. All Macy's/Bloomingdale's facilities will administer the Vendor Standards as specified in the Vendor Standards, including in this Manual and as set forth below:

1. All facilities will process (with process defined to include either moving an item in the original factory wrap for delivery direct to the customer or to unwrap for inspection and/or deluxing) all merchandise confirmed for delivery to a customer. In either case, if any type of touch-up or repair is required due to a vendor defect, an expense offset will be assessed. No free time will be provided if it is necessary to conduct a touch-up or repair due to a vendor defect.

2. All merchandise determined to be defective by our quality control inspector will be returned to the resource for full credit. In general, if a manufactured defective product can be repaired in our workroom in less than 30 minutes, we will complete the repair and charge the vendor, unless other satisfactory arrangements are agreed to by both the Vice President Merchandise Manager and the Vice President National Director of Quality. At times it may be necessary to spend more time repairing merchandise as to not fail a customer delivery. In this case the vendor will also be charged based on the time needed to complete the repair. The vendor will be responsible for the initial and the return shipment costs of every defective item being returned if not picked up on a vendor assigned carrier.
3. The vendor will be assessed a 7% of cost handling fee on all defective returns. If the vendor requires that defective items be cartoned, an additional 10% of cost charge will be assessed to offset the expense for labor and materials. Total charges for the return of defective merchandise will not exceed 17% of cost, excluding freight, unless there are special circumstances that are negotiated between the Division and the liable vendor. To ensure prompt delivery to our customers, we will perform minor repairs on defective merchandise where determined to be appropriate by Macy's or Bloomingdale's personnel.
4. The vendor will be charged the rate of \$60.00 per hour, with a minimum of ¼ hour.
5. Seasonal and stock adjustment returns will be determined by the Division merchants and vendor on a one-on-one "as needed" basis.
6. In order to meet customer delivery and service standards, furniture and bedding vendors can be assessed late fees when purchase order receipt and cancel dates are extended due to vendor delivery delays. Late vendor shipments resulting in non-delivery to our customer can be assessed equal to 10% of the merchandise cost, a \$50 per incident charge plus costs incurred by the divisions such as customer adjustments and accommodations.
7. All expense associated with in home servicing of defective merchandise will be charged back to the vendor at the rate of a minimum \$50.00 per incident. The \$50.00 minimum charge represents the cost of the service call and any minor repairs made by the service technician while in the customer's home. If a part is needed to affect the repair requiring a second service call, the second call will be treated and charged as a separate incident.
8. The vendor will be charged a \$75.00 fee for all exchanges and pick-ups when the cause is due to the merchandise being vendor defective. Redelivery of item(s) being exchanged or picked up will not be charged back to the vendor.
9. The workroom charge and deduction policies for Bedding are as follows, as specified below for:
 - a. Late vendor shipments resulting in non-delivery to a customer, unless due to a purchase order having been transmitted outside the LVI guidelines.
 - b. Failure to notify the appropriate Macy's/Bloomingdale's receiving facility no later than 12:00 p.m. (noon) local time, the day prior to physical shipment, of any inability to ship in accordance with a purchase order.
 - c. Soiled and/or damaged merchandise received via LVI that result in missing delivery to customer.

10. All facilities must receive parts needed to replace damaged or defective items within twenty-one (21) days and must meet all acceptable quality standards to affect repair as new. If the part(s) received does not meet the guidelines as outlined above, then the merchandise will be returned to the liable vendor at the vendor's expense including freight unless other arrangements are agreed to by the Vice President National Director of Quality. In addition, Supply Chain requires that you utilize our internet based Parts Ordering and Tracking System (POTS), as the only method to receive parts orders from Facilities and our third party home service technicians. POTS is the required method for identifying part orders, updating part order confirmation, shipping and cancellation information. A confirmation email is provided for information only. To use POTS, you must first register on-line at www.macysnet.com.
11. Where vendor uses outside In-Home networks, vendor must have them become pre-authorized by the Vice President National Director of Quality and in writing.
12. All vendors are required to register and use our automatic email notification system for notification of failure to follow Macy's and Bloomingdale's Vendor Standards or other quality issues. We are able to send you information regarding all expense offset deductions via email. This provides you with feedback on any non-compliance issues, allowing you to correct future shipments and avoid additional charges. To receive automatic notification of Expense Offsets (including workroom). Send an email request to helpdesk.macysnet@macys.com.

Vendor Clinics for Defects Inspections

1. Vendor's representative will be responsible for visiting the Macy's facility on a schedule determined by the facility Quality Director or RTV Manager. The schedule must permit timely disposition of merchandise to be considered for return authorization. Merchandise deemed defective by the vendor's representative and the facility will be identified to the vendor's corporate office for return authorization.
2. The vendor will be responsible for sending a qualified representative that will have authorization for inspection and disposition of defective items. A maximum of two weeks will be considered normal for the process of notifying the vendor representative, representative's visit and final disposition of defective merchandise. The representative will inspect merchandise that has been classified as defective, or found damaged as a result of poor packaging by our RTV Manager.
3. Once the inspection is performed, a RA (Return Authorization) must be issued within two (2) working days. Once the RA is received, the goods must leave the facility within five (5) working days.
4. It will be the responsibility of the vendor's representative and quality control manager to make a decision in regard to the defective or damaged merchandise's disposition. In cases where special requirements are made for the return of merchandise such as shipping labels or truck authorization, the vendor's representative must have the necessary papers in his/her possession at time of inspection.
5. If the vendor or its representative cannot meet the above guidelines, the Facility Quality Director reserves the right to notify the vendor with a list of the items determined to be defective and then return the defective merchandise. If no vendor authorization is

received within three days of notification, the merchandise will be returned for full credit at vendor's expense, including freight.

6. Quality inspections of inbound product are a standard procedure at each facility. This is done to ensure adherence to all standards. It is also used to share and communicate information with our vendor partners.
7. Standard freight claim procedure will be followed in the case where damaged items are a result of the common carrier. When a resource carrier is used, the damaged or defective merchandise may be returned in the same truck.

Furniture Workroom Expense Offsets and In Home Service Expenses

Our **Workroom Policies** are intended to recover the cost incurred by Macy's and Bloomingdales due to vendors whose merchandise **does not meet our minimum quality requirements** or is not shipped in compliance with our standards.
